

Evidence-Based Decision Making

Decisions based on the analysis and evaluation of data and information are more likely to produce desired results.

1. Gathering evidence:

- Seek out best available research evidence
- Collect contextual information on factors important for the decision
- Draw upon the expertise and knowledge of others

2. Interpreting evidence:

- Analyzing the data
- Consider the strength of the research evidence
- Explore the experience, preferences, and values of others.

3. Applying what you learned from evidence:

- Consider all three types of evidence to make effective decisions
- 

Actions to Take (As per ISO 9001: 2015)

- ✓ Determine, measure and monitor key indicators to demonstrate the organization's performance.
 - ✓ Make all data needed available to the relevant people.
 - ✓ Ensure that data and information are sufficiently accurate, reliable and secure.
 - ✓ Analyze and evaluate data and information using suitable methods.
 - ✓ Ensure people are competent to analyze and evaluate data as needed.
 - ✓ Make decisions and take actions based on evidence, balanced with experience and intuition.
- 

Key Benefits (As per ISO 9001: 2015)

- ✓ Improved decision-making processes
 - ✓ Improved assessment of process performance and ability to achieve objectives
 - ✓ Improved operational effectiveness and efficiency
 - ✓ Increased ability to review, challenge and change opinions and decisions
 - ✓ Increased ability to demonstrate the effectiveness of past decisions
-
