

7.1.3. Infrastructure

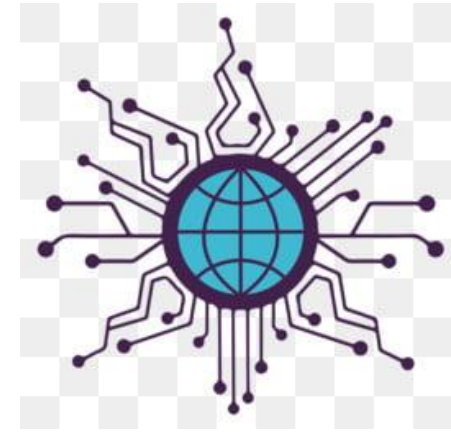

The organization is required to determine, provide, and maintain the environment necessary for the operation of its processes and to achieve conformity of products and services.

Infrastructure

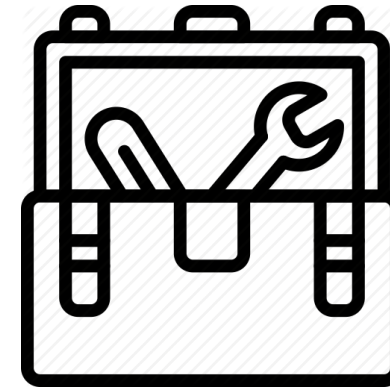

Facilities/Buildings

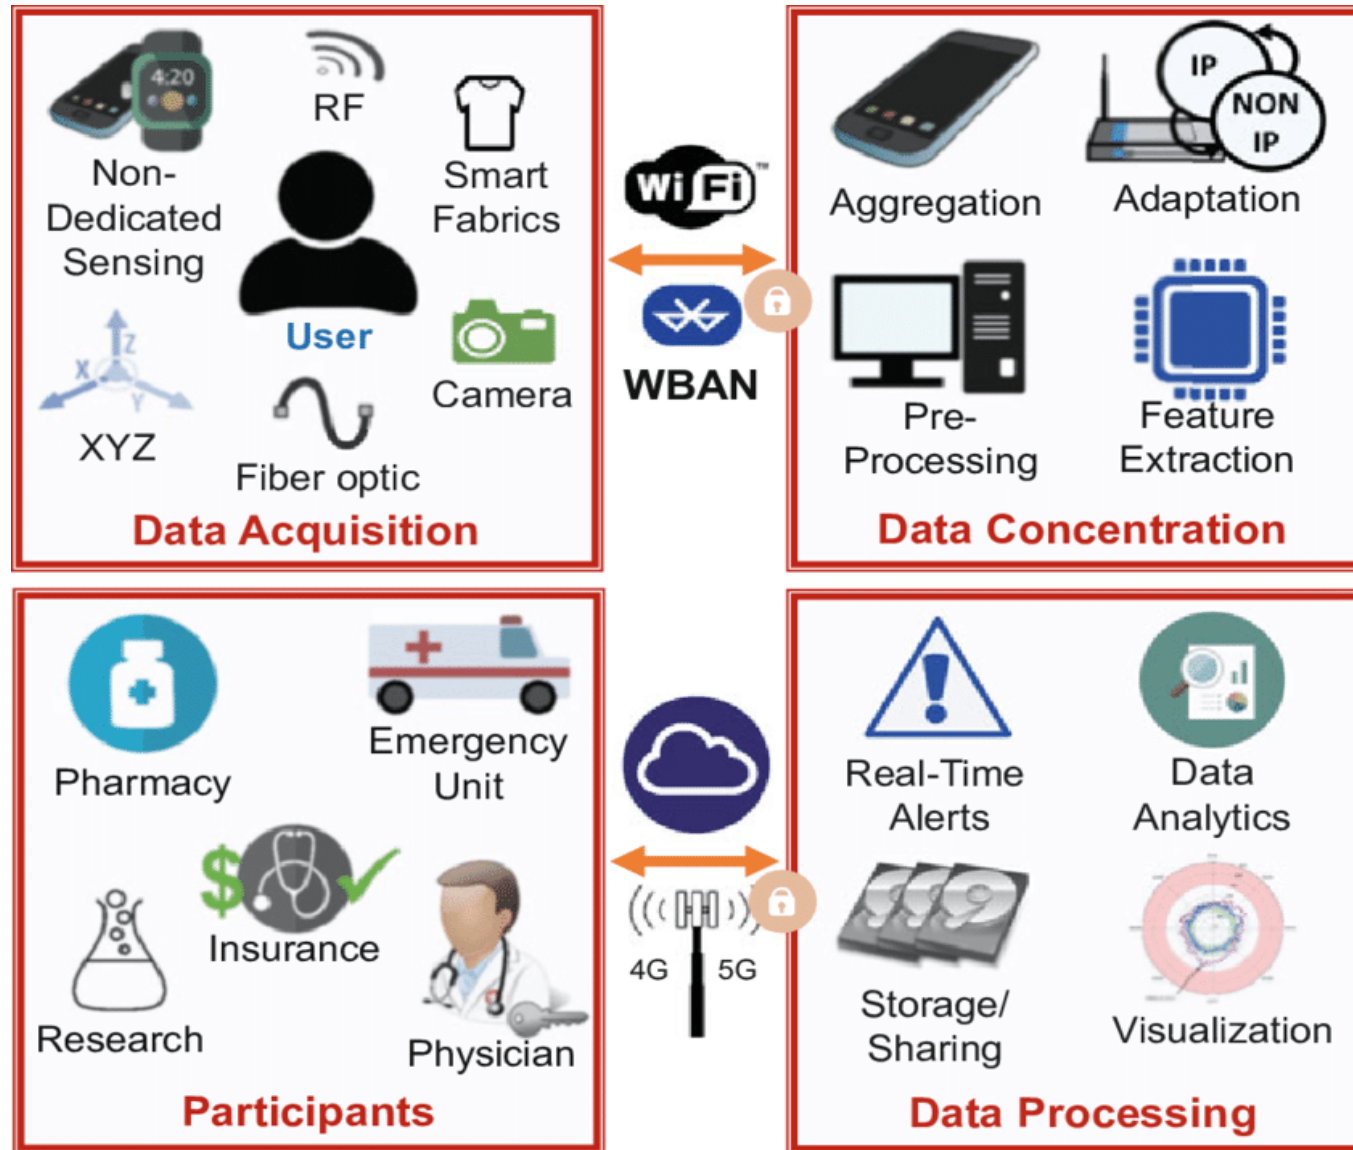

Information/Communication

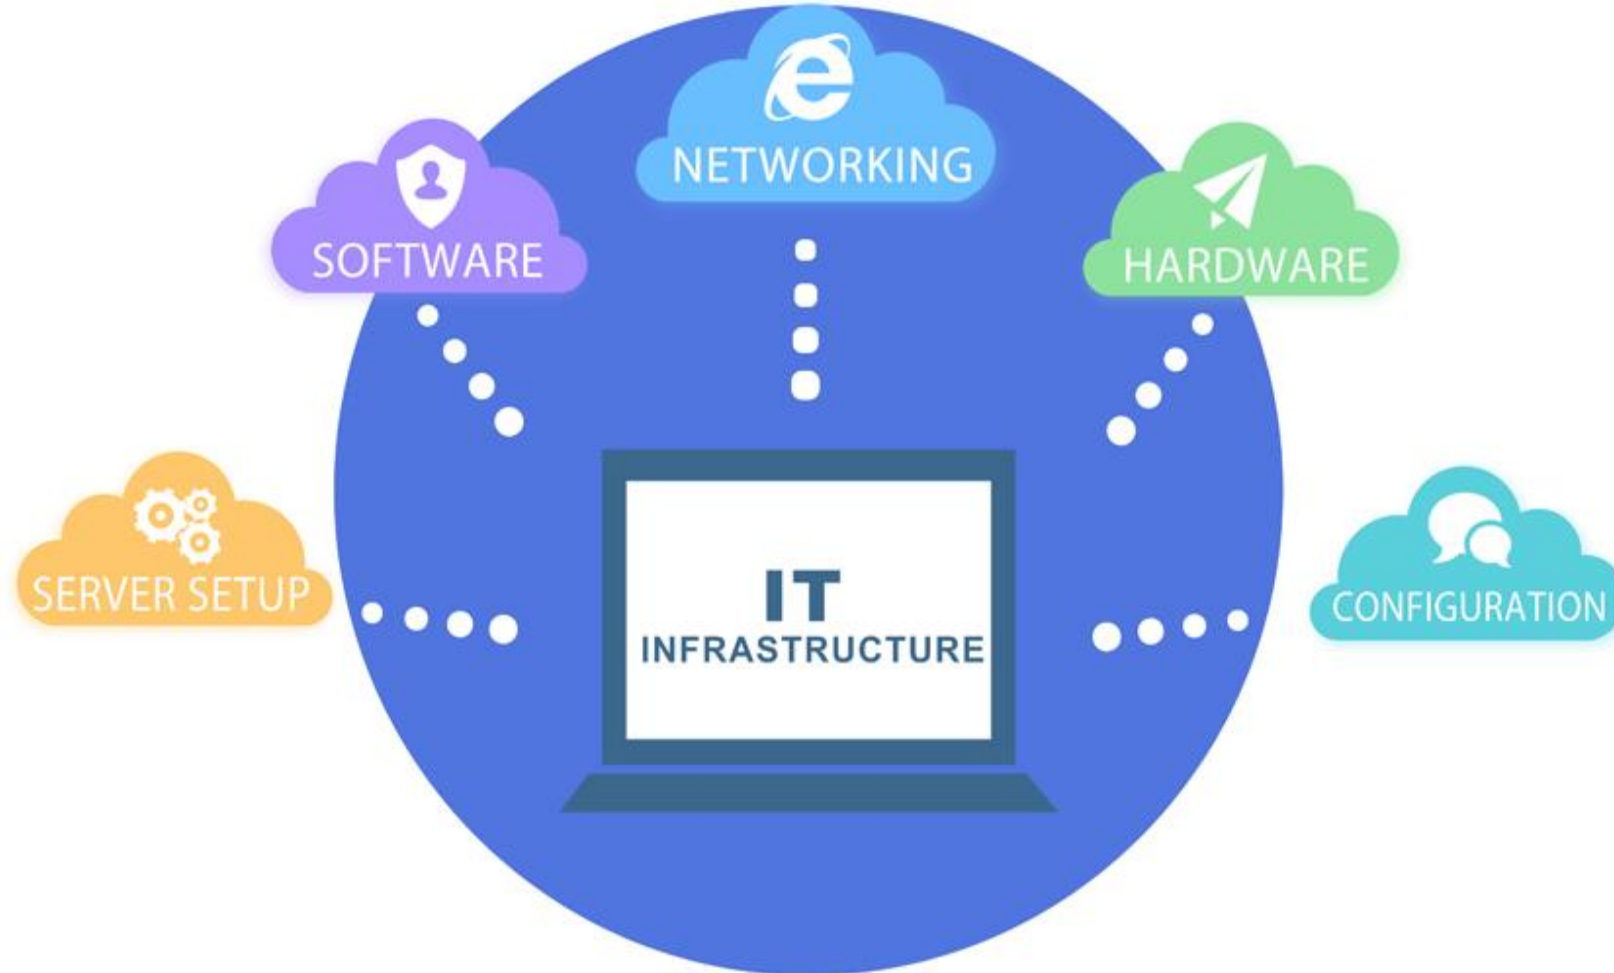

Transportation

Equipment

Auditing

- ✓ Review documents
- ✓ Ensure risks and opportunities related to infrastructure are identified
- ✓ Ensure infrastructure is preserved/maintained
- ✓ What kind of maintenance is performed? (corrective+preventive)
- ✓ Who's responsible for maintenance?
