

8.3.6. Design and Development Changes

The organization is required to identify, review, and control changes made during, or subsequent to, the design and development of products and services, to the extent necessary to ensure that there is no adverse impact on conformity to requirements.

Retain documented information on:

- ✓ Design and development changes
 - ✓ Results of reviews of changes
 - ✓ Authorization of the changes
 - ✓ Actions taken to prevent adverse impacts
- 

Auditing

- ✓ Are the sources and requests for changes properly identified and communicated?
- ✓ Is the impact of any change evaluated?
- ✓ Is any additional design proving or testing undertaken where appropriate?
- ✓ Are the effects of the changes on products (or constituent parts) and services already delivered evaluated?
- ✓ Has appropriate approval been given before a change is implemented (this could include statutory or regulatory approval or approval by the client)?
- ✓ Are the changes fully documented and do records include information regarding any necessary additional actions?
