

8.4. Control of Externally Provided Processes, Products, and Services

8.4.1. General

The organization needs to consider the impact of suppliers on what they provide the customer and how it may reflect if something goes wrong when they recommend a product.

The organization is required to ensure that externally provided processes, products and services conform to requirements.

External providers:

- suppliers
- subcontractors
- associate companies

The organization is required to determine the control applied to externally provided processes, products, and services

- ✓ Self-assessment questionnaires
- ✓ Audits of the supplier's quality management system
- ✓ Audits of the supplier's processes

The organization is required to determine and apply criteria for the evaluation, selection, monitoring of performance, and re-evaluation of external providers, based on their ability to provide processes or products and services in accordance with requirements

Documented information is required

- ✓ Technology
- ✓ Quality
- ✓ Responsiveness
