

8.4.3. Information for External Providers

The organization is required, where appropriate, to communicate not just the products or services they wish to receive but also any processes they want the external provider to undertake on their behalf.

- ✓ Defining product approval requirements
 - ✓ Defining intended verification arrangements
 - ✓ Defining personnel qualifications and quality, environmental, and safety requirements
 - ✓ Maintaining records
- 

Purchasing Verification

- ✓ QMS requirements
- ✓ Competence of external personnel
- ✓ Purchase orders
- ✓ Purchasing specification
- ✓ Purchasing agreements
- ✓ Delivery notes
- ✓ Release certificates
- ✓ Certificates of conformity
- ✓ Inspection and acceptance tests
- ✓ Product specifications
- ✓ National or international standards

Receiving Inspection

- ✓ Confirmation of identification using purchase order number, drawing numbers, material markings etc.
- ✓ Confirmation of adherence to delivery schedule
- ✓ Confirmation of conformance to purchase order requirements
- ✓ Confirmation of correct quantities
- ✓ Visual examination for obvious defects
- ✓ Measurement comparison to drawings where required
- ✓ Specified certification/documentation as required

Auditing

- ✓ Confirm that the specification quoted in a purchase order is the same as the specification contained in the design (or the specification received from the customer);
- ✓ Identify whether or not there were discussions between the organization and potential suppliers regarding the design specification of critical components during the design process or prior to an order being placed;
- ✓ Was there some form of “approval” of the specification before the final specification/order was confirmed to the external provider?
- ✓ Does the purchase order contain or refer to any statutory or regulatory requirements?
