

8.5.6. Control of Changes

The organization is required to review and control changes for production or service provision, to the extent necessary to ensure continuing conformity with requirements

- ✓ Retain documented information about any changes

- ✓ Who authorized the change

- ✓ The actions arising from the change

- ✓ Risk-based thinking

Auditing

- ✓ Is the impact of the change evaluated to determine its affects to work in process or products already delivered?
- ✓ What process control documentation (procedures, forms, etc.) will need updating as the result of change to be implemented?
- ✓ Was the change approved prior to implementation including, where applicable, approval by the customer, statutory or regulatory authority?
- ✓ Review documented information – Does retained documented information indicate the source of change and information on necessary actions and approvals?
