

ISO 9001:2015 Quality Management System Auditor

- Design and development inputs -

The organization is required to determine the inputs for the design and development process.

Inputs = clear, unambiguous, complete and adequate.

Elements to be taken into consideration:

- functional and performance requirements;
- information from previous similar design and development activities;
- statutory and regulatory requirements;
- standards or codes of practices;
- potential consequences of failure.

The organization has to retain documented information on design and development inputs.
